Renewable energy communities (RECs) have multiple benefits, from reducing energy poverty to bringing together neighbours and creating a sense of belonging. RECs are essential for the green energy transition and to reach the EU's goal of climate neutrality by 2050. Yet, what is needed to establish these networks and ensure they reach their full potential?

This event brings together four RECs from the EU-funded Interreg MED Renewable Energy project, sharing their experience of using the ETU Toolbox to boost the energy transition in their municipality; this will be followed by an expert panel discussion to establish a mainstreaming roadmap towards a sustainable and secure energy supply across the Mediterranean.

Agenda

Time		Speakers
11:00 – 11:05	Welcome remarks	
11:05 – 11:45	Roundtable ‘Experiences and Lessons Learnt by the ETU Flagship Cases’ Renewable Energy Communities’	Sergio Olivero, <i>representative of Magliano Alpi</i> Carmelo Licitra, <i>representative of Ragusa</i> José Miguel Granados, <i>representative of Monachil</i>
11.45 – 12.00	Q&A	
12.00 – 12.05	Presentation of the second session	
12.05 – 12.55	Panel discussion The Importance of Renewable Energy Communities in the Energy Transition: Legislative Frameworks and Barriers to Implementation across the EU	Stavroula Pappa, <i>Policy Expert at REScoop.eu</i> Fedarene Achille Hannoset, <i>Policy Officer at DG ENER (EU Commission)</i> Moderator Lara Barange, <i>Communications Manager Interreg MED Renewable Energy Project</i>
12.55 – 13.10	Q&A and closing remarks
