

Project co-financed by the European
Regional Development Fund

Interreg MED Renewable Energy

Together we'll create a resilient future

REVOLVE

The **Interreg MED Renewable Energy** project promotes the integration of renewable energies across the Mediterranean, with a focus on **rural and island areas**.

What is the ETU?

Based on three years working with Mediterranean municipalities, the project developed its **Ecosystemic Transition Unit (ETU)**, and a set of tools to support decision-makers to increase the use of renewable energy in their region, whilst addressing their **social, environmental, political, and technological needs**.

Since 2016, Interreg MED Renewable Energy's project partners have worked with territorial leaders across the Mediterranean to implement the ETU, increasing their resilience to climate change.

The ETU Manifesto

Holistic response to climate change

Territorial equity

Social innovation

Green economy

Cooperation and commitment

Join the ETU Initiative!
Together we'll create a resilient future

The ETU addresses four elements of the energy transition:

Transferring and Mainstreaming

The ETU Initiative works with municipalities across the Mediterranean to boost the energy transition by applying the ETU Toolbox.

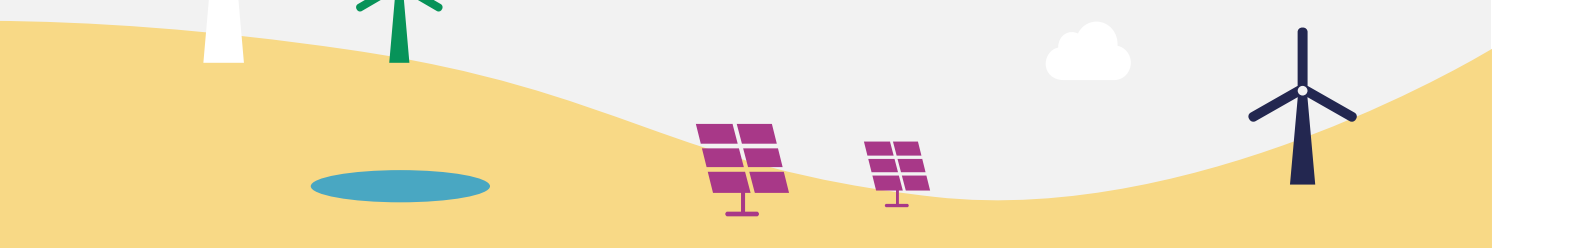

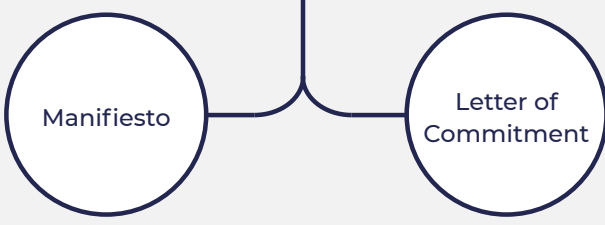

Two dark blue circles are connected by a horizontal line. The left circle is labeled 'Regional Groups' and the right circle is labeled 'Flagship Cases'.

ETU Resources

The ETU Initiative offers open-access resources for municipalities to develop renewable energy plans, based on the four pillars.

Two green circles are connected by a horizontal line. The left circle is labeled 'Handbook' and the right circle is labeled 'Video Tutorials'.

Upscaling

How to join the ETU?

The ETU Initiative is designed for local authorities, entities, and organisations that:

- Wish to set up a local energy community
- Are developing a Sustainable Energy and Climate Action Plan (SECAP)
- Have an idea for a renewable energy project or initiative.

You can join the movement by signing the **ETU Manifesto** - showing your support for the Initiative's principles, and increasing the impact of our work.

And, if your municipality or organisation is ready to **sign our letter of commitment**, they'd become part of our supportive network of like-minded organisations using the ETU Toolbox to boost their renewable energy plans.
